

NU-100

Digital Surface Temperature Gauge

Features include a battery powered LCD temperature display, a 10 foot waterproof probe, and built-in suction cups for easy mounting.

Sensor Installation:

To measure the water temperature, the sensor should be mounted to assure contact with the water at all times. A common location is towards the middle of the stern on the boat.

1. Slip the end of the thermostat probe through the rubber "o" ring
2. Snap "o" ring over end of suction cup
3. Adjust probe to desired depth
4. Attach to clean, smooth surface.

Specifications:

Range: -40°F to 122°F with .1°F Resolution

Size: 2.4" Square Case (Water Resistant)

Display: .5" LCD

Mounting: Suction Cups

Power: 1.5v SR-44 Button Battery

Sensor: Plain .25" x 1" stainless steel on a 10ft coated copper wire
